SUPPORTING LIFE

Curera® Ear Pillow

A pillow designed to support and relieve sensitive ears, an area that is particularly prone to pressure ulcers when a user lies still in bed.

The pillow supports the face and the oval-shaped hole totally relieves pressure off the ear.

The ear pillow comes with a cotton cover and a hygiene cover. Accordingly, it ought to be used as a product intended for a single user.

The hygiene cover does not allow liquid or air to penetrate, but is vapour permeable (vapour is wicked away). Make sure that the patient is positioned correctly so that airways are unobstructed.

Always read the instruction for use prior to usage of the product.
