SUPPORTING LIFE

Curera® Triangle Pillow

If a person makes too few spontaneous movements, there is an increased risk of pressure ulcers. Regular changes of position reduce the risk of pressure ulcers. Position as required in both reclining and seated position.

Curera® Positioning is a range of stable pillows, rolls, and wedges that meet most needs for support and relief. They are also a great help when changing dressings and for patient care. Our soft hygiene covers and cotton covers are also available as accessories to the pillows and rolls.

The hygiene cover does not allow liquid or air to penetrate, but is vapour permeable (vapour is wicked away).

Make sure that the patient is positioned correctly so that airways are unobstructed.

Curera® Triangle Pillow is placed under the knees to reduce shearing forces when sitting and enables a resting position when lying down. The Triangle Pillow can also be placed as a back support pillow behind the patient's back.

POSITIONING EXAMPLE

CLEANING	FACTS
<p>The Hygiene Cover can be wiped clean with detergent and/or disinfectant. Machine wash at max. 95 °C.</p> <p>Inner pillow: Machine wash at max. 95 °C.
