

Curera[®] Levelling plate

For levelling the seat surface in wheelchairs

Curera® Levelling plate

If the seat surface in wheelchairs needs to be levelled, this is available as an accessory. This is a stable sheet which can be placed in the cover on the underside of the cushion. It is easy to clean and take care of.

Can be used with all Curera® seat cushions apart from Tremix which already has this function.

Always read the instructions for use prior to use.
