

Curera® Support Wedge

For positioning & position changing

Movement serves as a protective mechanism against pressure injuries and other bed-related complications. Individuals with decreased sensation, limited mobility, and/or altered consciousness may lack the ability to respond to the body's warning signals, such as pain or discomfort.

In such situations, individuals may need support and relief in lying and sitting position. Our product series of positioning pillows is used as an aid to relieve pressure and provide support during positioning and position changes, benefiting both the individual and the caregiver. Regular, minor adjustments in position are often enough to ensure proper blood circulation⁽¹⁾, thereby reducing the risk of pressure injuries.

Example of positioning

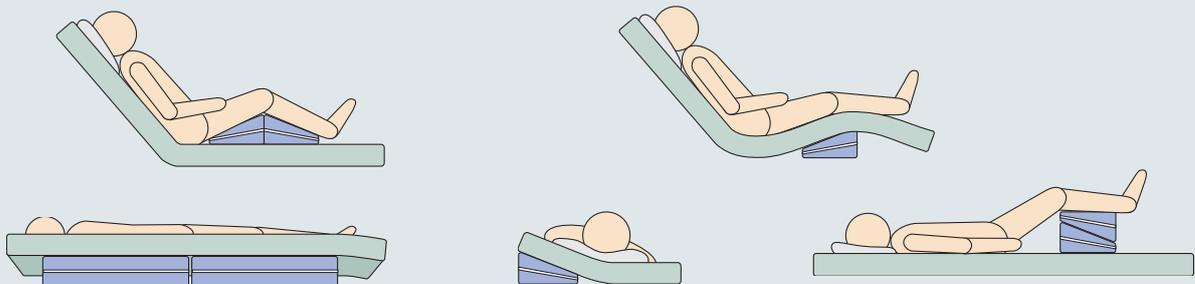

Curera® Support Wedge is a versatile cushion that can be used in a resting position to relieve the shoulder, sacrum, hip, and heel.

Curera® Support Wedge can also be used to reduce the risk of shear in a semi-seated position by placing the wedge under the knees.

Covers for comfort and hygiene

Curera® Support Wedge comes with a liquidproof hygiene cover for easy cleaning.

The liquidproof hygiene cover is manufactured in a four-way stretch⁽²⁾⁽³⁾ fabric to reduce the risk of shear forces, and is vapour-permeable⁽⁴⁾ to lower the risk of skin maceration. The hygiene cover also features a liquidproof zipper.

Technical specification	
Filling	100 % cold foam
Sizes	70 x 26 x 15/5 cm, 50 x 26 x 15/5 cm
Available covers	Hygiene cover (polyurethane coated polyester)
Cleaning instructions	The hygiene cover can be wiped clean with detergent and/or disinfectant. Machine wash at max. 95 °C.
CE-marking	Registered and marked in accordance with MDR (EU) 2017/745
